Pranali Ravindra Maral

Mobile: +91 7350461202 # **Email:** maralpranali@gmail.com
ï **LinkedIn:** linkedin.com/in/pranali-maral § **GitHub:github.com/maral-pranali05/pranali-maral**

Professional Summary

Detail-oriented **BBA-CA student** and aspiring **Data Analyst / Data Science professional** with a strong foundation in **data analysis, visualization, and database management**. Proficient in **SQL, Python, Power BI, Tableau, and Excel**, with hands-on academic project experience involving **sentiment analysis, geospatial analysis, and operational analytics**. Seeking an entrylevel opportunity to transform data into actionable business insights.

Education

Bachelor of Business administration (Computer Application) — **2023–2026**
Sarhad College of Arts commerce and science katraj pune 46 — CGPA: 9.27
Savitribai Phule Pune University

Higher Secondary Certificate — **2022–2023**
Sarhad junier college katraj pune 46,pune university — Percentage:80.17%

Secondary School Certificate — **2020–2021**
Bharati vidhyapeeth secondary girls highschool pune 43 Pune university — Percentage: 83%

Technical Skills

Data Analytics & Visualization

- SQL, PL/SQL ,Python, R ,Power BI, Tableau ,Microsoft Excel (Pivot Tables, Functions, Charts)

Programming & Web Technologies

- Java, C, C++ HTML, CSS, JavaScript , PHP

Tools & Platforms

- Git & GitHub ,Visual Studio Code ,Jupyter Notebook ,Operating System: Windows

Soft skills

- Data Cleaning & Transformation ,Dashboard Design & Data Visualization Analytical Thinking & Problem Solving

Academic Projects

1 Workforce Analytics & Attrition Prediction

Tools: Excel, Python, Power BI

HR Analytics Project using Excel, Power BI & Python
Developed an end-to-end HR analytics project to analyze employee data and generate actionable insights. Utilized **Excel** for data cleaning and preprocessing, **Python (Pandas, Matplotlib, Seaborn)** for exploratory data analysis and visualization, and **Power BI** to build interactive dashboards.

Analyzed key HR metrics such as employee attrition, salary distribution, job roles, and performance trends. Identified patterns affecting employee turnover and provided data-driven insights to support HR decision-making.

2. Traffic Analysis & Prediction using Machine Learning

Tools: Excel, Python, Power BI

Traffic Analysis & Prediction using Machine Learning
Developed a traffic analysis and prediction system using **Machine Learning** techniques to forecast traffic patterns and congestion levels. Performed data preprocessing and exploratory data analysis using **Python (Pandas, NumPy, Matplotlib, Seaborn)**.

Analyzed historical traffic data to identify peak hours, traffic density, and influencing factors. Built and trained machine learning models (such as **Linear Regression / Time Series models**) to predict future traffic trends with improved accuracy.

Created interactive dashboards in **Power BI** to visualize traffic patterns, congestion hotspots, and prediction results, enabling data-driven traffic management decisions.

3. Aadhaar Data Analysis using Power BI

Tools: SQL, Excel, Python, Power BI

Developed an interactive Aadhaar Data Analytics dashboard using Power BI to analyze large-scale demographic and enrollment data. Performed data cleaning and transformation to ensure accuracy and consistency.

Visualized key insights such as state-wise enrollment, gender distribution, age group analysis, and regional trends using charts, maps, and filters. Enabled easy exploration of data through dynamic dashboards to support data-driven decision-making.

Certifications & Courses

Masters in Data Science and Analytics with AI
IT Vedant Education Pvt. Ltd.
Covering: MS Excel, MySQL, PowerBI, Tableau, Python Analysis, Machine Learning

IBM Python for Data Science
PY0101EN - IBM Developer Skills Network

IBM Machine Learning with Python
ML0101EN - IBM Developer Skills Network
